The most advanced reusable N95-level respirator mask

Combining the safety of $\geq 95\%$ PFE, the comfort of an elastomeric face seal, cost savings compared to disposable masks and optional embedded NFC technology for cloud-based inventory management¹, Precision AIR™ is truly the most advanced personal protective device.

Designed for safety, engineered for comfort

We believe that safety should not come at the cost of comfort, and have created a mask that fits the needs and faces of care providers. A recent study showed that after one month of using reusable masks, 0 out of 2000 healthcare providers chose to return to using disposable N95 masks!²

Saving cost while saving the environment

Designed for easy cleaning, Precision AIR™ is less expensive than disposable N95 masks. One study has shown reusable masks more than 10x less expensive²! Our disposable caps and filters are made of recyclable material. Reduce waste; increase savings.

The personal solution for healthcare professionals

Our large custom filters allow greater air flow, which optimizes acoustic resonance so that your voice will be heard loud and clear while your face will remain cool and comfortable.

Rigorously tested, ruggedly reliable

Our engineers have built a mask that can work as hard as you can, without taking a break. We've tested and validated the performance of Precision AIR™ to meet or exceed NIOSH and CAN/CSA standards, and possess Health Canada authorization.

Available in Small/Medium and Medium/Large sizes
